Resource Efficiency Assessment

- Independent specialist advisors will visit your site:
 - Sector/topic experts where possible
- Usually a few hours to > 1 day to:
 - Observe processes, talk to staff
 - Gather relevant data, utility and waste bills
- A follow up report is issued to the business with a bullet-point action plan:
 - short, medium, long term actions
 - potential environmental benefits and cost savings.
- Green Business can also advise on regulatory issues.

Confidentiality

- All information and data generated by using the service is treated in strictest confidence.
- It is NOT intended as an enforcement mechanism for any statutory authority.
- Users will only be able to access their own company information.

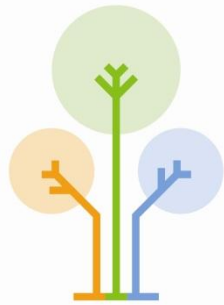

Case Studies

- Participating companies invited to provide case studies on their Resource Efficiency successes
- The total value of cost savings and environmental savings will be highlighted as case study examples to other similar sites
- Case studies can be anonymous just outlining the type of company/sector.

Other Elements of Greenbusiness

- Other elements to the website include:
 - Top Tips on water, waste and energy reduction
 - Links to other relevant sites
- Referral to other programmes:
 - SEAI's energy advice and mentoring service
 - Enterprise Ireland- GreenTech support
 - Repak – Prevent and Save
- Workshops for specific sectors.
- Awards scheme (under development)
